

Optical Crystal

what's the big deal?

- Precut and polished optical crystal from China is in stock at our North American locations ready to be decorated for quick turnaround.
- Optical Crystal is 100% Lead Free and extremely hard. This hardness provides for brilliant bevels and a high polished surface.
- Overseas cutting, beveling and polishing makes these dealtoys a great value when compared to cast acrylic or waterjet cut financial tombstones.
- Gift boxed in presentation boxes

Decorating options

- Etching - with or without colour fill.
- Digital printing- for photos or multi coloured designs.
- Silk Screening - for one or two colour jobs including personalization.
- 3D interior etching - 3D objects lasered inside the glass.
